Only the riders best time is listed regardless of the number of 40K TT ridden during the 2008 TT series.

The actual distance of the 40K TT is 39.606K. The shorter distance is the results of the track layout. The LMS NASCAR track is measured with the stock cars riding on the high banks of the turns.

Since cyclists can't sustain the speed necessary to hold the 24 degree banks, it is not possible to ride a full 1 ½ mile line per lap. The difference per lap is slight, but when racing 17 laps it does add up. Race Officials have chosen to consider the 39.606K actual distance a nominal 40K.
