

Weather Emergency Situations

In the advent of a weather emergency while at Lowe's Motor Speedway for the time trials, the event will be stopped or delayed and everyone is requested to take shelter in the NASCAR garage where registration is held. Please follow the instructions of Track and Event Officials. At their sole discretion, officials may decide to delay or cancel the event. No one is to be in open areas of the track during a lightning storm.

Unlike NASCAR, we do ride in the rain. The Time Trials @ LMS are held rain or shine; however, in the event of lightning or the potential of other hazardous weather conditions in the area of the speedway, Event and/or Track Officials may decide to delay the start, suspend, or, if the weather will not likely pass quickly cancel the TT event. We would regret this happening, but everyone's safety dictates the situation. We would hope to reschedule events but due to the track schedules this may not be possible. Emergency situation/race updates outlined above will be provided in the garage area. If the event is canceled, no refunds are issued.

During rain or if the event needs to be restarted after a storm or lightning delay, each rider must decide for themselves if they want to ride or not that evening.

We are very fortunate to have use of the facilities at Lowe's Motor Speedway but our agreement dictates that we are off the site by a pre-determined time. Depending on the situation, and the time remaining that the CCTTA has use of the track, start times could be compressed. In this situation Race Officials will call riders to the start area by race classification (bib color). The Start Line Official will decide the specific starting order and fill gaps as needed. Please follow the instruction of Event and Start line Officials.
